

Canada's largest trade show for plumbing, hydronics, HVACR, electricity and lighting

## MCEE 2019 consolidates its position as a must-attend event in Canada!

Held at Place Bonaventure in Montreal on April 24 and 25, 2019, MCEE connected its 5,335 visitors with a record [414 exhibitors](#), consolidating its position as a must-attend event in Canada for the plumbing, hydronics, HVACR, electrical and lighting industries.

Visitors saw thousands of products throughout the exhibit hall and the [New Product Showcase](#) placed an extra spotlight on 84 products that increase the efficiency and safety of mechanical and electrical installations. Seeing new products was the #1 reason to attend for 82% of MCEE visitors.

"With its new products and technical seminars, which had a combined attendance of more than 1,200, and the variety of exhibitors, the MCEE show was once again a premiere event for industry members," says André Bergeron, General Manager of the Corporation of Master Pipe Mechanics of Quebec.

"MCEE brings all the stakeholders together. Visitors were able to see new products and technologies that will help them be more knowledgeable, productive and profitable. Exhibitors were able to showcase their products to current and potential customers, meet directly with decision-makers and increase their brand awareness" said Ralph Suppa, President and General Manager of the Canadian Institute of Plumbing and Heating.

"After seven editions at Place Bonaventure, MCEE is moving to the Montreal Convention Centre (Palais des congrès). The next edition, taking place on April 7 and 8, 2021, will see some exciting new features to provide even more value to exhibitors and visitors" concluded Mr. Bergeron.

The [virtual edition of MCEE 2019](#) is still open; visitors can search the show by exhibitor name or product type and view detailed information about exhibitors and their products.

MCEE is produced by the Corporation of Master Pipe Mechanics of Quebec ([CMMTQ](#)), the Canadian Institute of Plumbing & Heating ([CIPH](#)), Corporation of Master Electricians of Quebec ([CMEQ](#)), and the Corporation des entreprises en traitement de l'air et du froid ([CETAF](#)), with support from EFC Quebec.
